#### **D. NEPA Adequacy Criteria**

1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?

Yes. The current Proposed Action was analyzed in the above mentioned Environmental Assessment (EA). The proposed action is the same action analyzed in the existing NEPA document.

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action, given current environmental concerns, interests, and resource values?

Yes. The existing NEPA documents analyzed the proposed action as well as a reasonable range of alternatives. The EA was reviewed by identified public interests and no conflicts or concerns were identified. The same applies to the current proposed action given current concerns, interests, and resource values.

3. Is the existing analysis valid in light of any new information or circumstances (such as, rangeland health standard assessment, recent endangered species listings, and updated lists of BLM-sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?

Yes. The proposed action is the same as the proposed action as analyzed in the EA. The EA was recently completed and there is no new information or circumstances in regard to this allotment which would warrant further analysis.

In support to the existing document a Rangeland Health assessment was conducted on the allotment. In the Rangeland Health Assessment (RHA) it was found that both Upland and Biotic Indicators, "meets" the standards of Rangeland health.

65042	09-28-2005

4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document? [Document and explain]

Yes, the direct, indirect and cumulative effects would be the same as stated in the existing NEPA document. The effects would not be changed considering the proposed action is the same as the proposed action as analyzed in the EA, along with no change in management.
